Immunisation Status for Family Assistance Office: Up to Date

Every effort is made to ensure that the information contained on the Australian Childhood Immunisation Register is correct. The data is based on information provided to Medicare Australia by immunisation providers and the accuracy of data is dependent on the quality and timeliness of information provided.

Immunisation records are only available from 1 January 1996.

The Australian Childhood Immunisation Register records details of vaccinations given to children under the age of seven years who live in Australia. An important role for the Immunisation Register is to keep parents and guardians informed about the immunisation details recorded for their child.

Please take the time to check your child's immunisation details are up-to-date.

If there is an immunisation missing on the Statement, it may simply be that this Immunisation History Statement was produced before your child's doctor or immunisation provider forwarded the details to the Immunisation Register. If so, you may want to check with them to ensure the details have been sent to the Immunisation Register and that your child is up-to-date with their immunisations.

If you have any questions about the Immunisation Register please call us on 1800 653 809.

Alternatively, for more information or to request an Immunisation History Statement for your child be sent to you by mail go to www.medicareaustralia.gov.au/yourhealth/our_services/aacir
